

## **Fiona Gupta, MD**

**Director of Movement Disorder Outreach**

**Assistant Professor of Neurology**

Dr. Fiona Gupta is a board certified neurologist and Fellowship trained Movement Disorders Specialist who has been in clinical practice for ten years. She is Director of the Movement Disorders Outreach Program at Mount Sinai Health Systems and an Assistant Professor of Neurology. A main area of focus for Dr. Gupta is on Deep Brain Stimulation and Neuromodulation and she has treated thousands of patients with DBS in her career. Prior to joining Mount Sinai Health Systems she was Medical Director of the DBS Program at Hackensack University Medical Center which was a program that she helped build from the ground up. Dr. Gupta has authored multiple publications, spoken at national and international congresses and works with numerous advocacy groups related to Parkinson's disease and deep brain stimulation. She is co-author of a recently published book titled "Parkinson's Disease for the Hospitalist: Managing the Complex Care of a Vulnerable Population". She has received numerous accolades throughout her career including being named the Most Compassionate Physician of her graduating class, Top Doctors, and has regular appearances in the media. She has been featured regularly on Fox and Friends, The Better Show and Sirius XM Doctor Radio, WPIX 11 NY and has made appearances on CBS NY, ABC NY, The Hannity Show, CCTV, PBS, WFAN 660 Radio, and Arise America. She has contributed extensively to print including pieces in the NY Times, The Washington Post, Glamour Magazine, Women's World Magazine, The Bergen Record, Health Magazine, Parade Magazine and Neurology Today. She is very involved with providing comprehensive, compassionate care to patients and caregivers and is actively working with multiple support groups in the community to promote advocacy. Dr. Gupta also runs her own monthly support group at Mount Sinai West for patients and caregivers called "Living Well with Parkinson's disease".
