Services to Keep
You Healthy

Travel Medicine

Traveling to places like Asia, India, South Africa, the Amazon or other developing areas can change your view of the world and make you feel wonderfully alive. But exotic excursions can also expose you to serious diseases that may threaten your health.

Zika virus, typhoid, hepatitis A, malaria, yellow fever and traveler's diarrhea can certainly ruin a trip, but they also have lasting health effects long after you return from your journey.

RVNAhealth Travel Medicine Specialists provide information, immunizations and prescriptions to greatly reduce the chances of contracting illnesses like these. We also provide counsel for those traveling to high altitude areas, to help ensure that your adventure is not derailed by discomfort or illness.

Travel Health Consultations are available at RVNAhealth
27 Governor Street, Ridgefield Connecticut 06877.

RVNAhealth Travel Specialists can administer the following commonly needed travel vaccinations:

- Hepatitis A & B
- Yellow Fever {temporarily out of stock}
- Typhoid
- Rabies
- Japanese Encephalitis
- Polio
- Meningitis
- Measles (MMR)
- Cholera
- Preventative medication for:
 - ~ Malaria
 - ~ Altitude Sickness
 - ~ Traveler's Diarrhea

RVNAhealth Travel Specialists also provide advice on ways to avoid the mosquitos that carry diseases such as:

- Zika virus
- Yellow fever
- Malaria
- Dengue fever
- Chikungunya

To schedule an appointment, inquire about travel medicine services or immunization needs, or for fee information, please contact us at info@rvnahealth.org or 203.438.5555.

Appointments are recommended four to six weeks before travel, but consultations for the last-minute travelers are still valuable.
